## **DETAILED ACTION**

### ***Information Disclosure Statement***

The documents cited have been considered to the extent as indicated on the 1449 sheets. The cited documents that have been lined through are either duplicate cites or applicants have not provided copies of the documents.

### ***Election/Restrictions***

1. Applicant's election of the species of claim 6 in the reply filed on April 20, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1713

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 6-15 and 17-153 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 6,7,14 and 17-236 of copending Application No. 10/640,435. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the overlapping subject matter.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 6-15 and 17-153 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-87 of copending Application No. 10/634,351. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the overlapping subject matter and the obvious genus species relationship.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 6-15 and 17-153 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15 and 17-170 of copending Application No. 10/782,306. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed article are fully encompassed by the fiber claimed in the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 6-15 and 17-153 are rejected under 35 U.S.C. 102(b or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dutt US 4,996,094 or Gipson US 6,730,739 or Medsker et al. US 6,084,031 or Rancich et al. US 6,086,996.

8. Each of the cited patents shows olefinic polymer compositions and articles formed therefrom. The incorporation of the claimed plasticizer is anticipated or obvious from the disclosed Parapol additives. These are polyalphaolefin oligomers and are stated as having some of the claimed properties. These polyalphaolefins are stated as having Kinematic viscosity and cSt falling within the scope of the claims it is reasonable

Art Unit: 1713

to presume that these compounds possess properties which anticipate or render obvious those claimed. Rejections under 35 USC 120/103 are proper when the art is silent as to properties but the PTO has a reasonable basis to believe that the compounds possess properties which anticipate or render obvious those claimed. Applicant has the burden of proof to establish an unobvious difference, see *In re Fitzgerald*, 619 F.2d. 67, 205 USPQ 594 (CCPA 1980),
